SUMMARY

Software Engineer with experience building and deploying production-ready backend systems using Node.js, TypeScript, and Docker. Strong foundation in clean architecture, REST API design, database transactions, and scalable system development. Open to Backend (Java / Node.js), Full-Stack (NestJS / Next.js), and Android (AAOS) roles.

EDUCATION

Duy Tan University · Bachelor of Information Technology · Da Nang, Vietnam *Aug 2021 – Jun 2025*

TECHNICAL SKILLS

Backend: Java (Spring Boot, Spring Security, JPA/Hibernate), Node.js (NestJS, Fastify, Express.js), REST API, tRPC, FastAPI

Mobile: Android (Kotlin, Jetpack Compose, MVVM, Hilt, Room, OkHttp), AAOS

Database: PostgreSQL, MySQL, SQLite, MongoDB, Redis · ORM: Prisma, Drizzle ORM, TypeORM, Hibernate

Frontend: React, Next.js, TypeScript, Tailwind CSS, Shadcn/ui · **DevOps:** Docker, Git, Linux, Bash, Inngest, Vercel, Postman

WORK EXPERIENCE

Backend Developer Intern · Tomosia Vietnam, Da Nang *Mar – Oct 2025*

- Built and maintained production backend services using **Node.js (Fastify) + TypeScript**, following Clean Architecture principles for maintainability and scalability.
- Designed **REST & tRPC APIs** handling concurrent requests with optimized database queries and proper error handling.
- Containerized services with **Docker** and automated deployment workflows via **Bash scripting**, reducing manual release overhead.
- Contributed **Next.js + shadcn/ui** frontend components for internal tooling, supporting full-stack feature delivery.

PROJECTS

Vehicle Telemetry System · Android (AAOS), Kotlin, Jetpack Compose, Spring Boot, Docker

- Built an **AAOS ForegroundService** streaming real-time vehicle telemetry at **10Hz via STOMP/WebSocket**; implemented **exponential backoff** reconnection to handle network instability on-device.
- Backend built with **Spring Boot + @Async** for non-blocking telemetry ingestion; containerized with **Docker**; architected with **Clean Architecture** across both Android and server layers.

Book Review Platform · Java Spring Boot, React, PostgreSQL Live

- **Spring Boot** REST API with **Spring Security JWT**, dual review system, toggle-like, server-side pagination, search & filter.
- Implemented **@Transactional rollback** on multi-step writes; configured CORS, input validation, and global error handling.

MeetAI — AI Video Meeting SaaS · Next.js, Node.js, OpenAI API, Inngest, Polar GitHub · Live

- Real-time AI transcription & summarization via OpenAI Multimodal API; **async job queue (Inngest)** decouples AI processing from request cycle; subscription payments via Polar, deployed on Vercel CI/CD.

Devhelp — Mezon Developer Bot · NestJS, TypeScript, SQLite GitHub · Demo

- **NestJS** modular bot: CRUD for commands/bugs/solutions with **soft delete & restore**, full-text search, severity classification, and bot lifecycle controls.

Clinic Booking System · Node.js, React, PostgreSQL, Stream API GitHub

- Backend services: appointment scheduling, patient CRUD, **JWT auth**, real-time call streams, and automated status notifications.

MazaBank — Desktop Banking App · Java, JavaFX, SQLite GitHub

- Role-based (Admin/Client) system: fund transfers, Checking/Savings accounts with transaction limits; **Singleton** pattern, custom JavaFX UI + CSS, SQLite persistence.

Medical Diagnosis Chatbot · Python, XGBoost, Apriori, Java Spring Boot GitHub

- ML diagnostic engine (XGBoost + Association Rules) on Disease Ontology pipeline with synthetic data generation; auth via **Spring Boot**.

CERTIFICATIONS & ACTIVITIES

- Cybersecurity Fundamentals — AUGEST Company (Sep 2024) Certificate
- Contestant — Mezon Bot Challenge: HelpDev Bot (Mar – Apr 2025) Certificate & Demo
